About us

MISSION & VISION

Beginning from 1998, AMPERA products today are manufactured in modern, well-equipped factories in Delhi and Gujarat. A large strength of engineers, technicians and skilled workers are involved in the manufacture of AMPERA products. Today AMPERA makes the widest range of PA products to meet every conceivable PA application requirement.

Our mission is to bring our performance closest to perfection and have no compromise policy on quality which will eventually help us to become the most trusted brand and a repeated name with our customers whenever they need any sound products. We always strive towards a better product quality, innovation and advancement. We source the best components from across the world, set the strictest process controls while manufacturing and have a no-compromise policy on quality control while testing. We offer the most performance for the money by finding the sweetest spot between price and diminishing returns. We've all been on the consumer side: music lovers, musicians, and audio enthusiasts looking for toptier sound without breaking the bank. Everything we do at AMPERA is customer-centric because that's how we define value.

RESEARCH & DEVELOPMENT

AMPERA has own well equipped research and development (R&D) department with highly skilled engineers and team headed by Mr. Ajay Gujral (H.O.D.), who have a huge experience of more than 35 years in audio industry. Under the vision of "Shape the Future with Innovation and Intelligence" AMPERA Research is actively conducting research and development (R&D) to identify new future growth areas and secure advanced technologies for its products to create new experience.

MADE IN INDIA

Almost all AMPERA amps are made in INDIA at the AMPERA production facility in Gujarat, India. Every amp at our unit is made with passion and precision, with a human touch that's rare in today's manufacturing processes: precision wiring, speaker fitting and amp covering are all done by hand. It is this attention to detail that sets AMPERA apart

12
